EDUCATION

B.Tech in Computer Science Engineering
Mahatma Gandhi Mission University

May 2022 – May 2026

EXPERIENCE

AI Engineer / Software Developer (Daten & Wissen)

Jan 2024 – Present

- Led the development of a Flutter app with face detection, achieving a 45% increase in detection accuracy for over 5,000 images using advanced analysis techniques.
- Reduced image processing time by 50% for 10,000+ images through optimization strategies, improving app efficiency and user experience.
- Integrated robust message encryption using RES, ensuring secure data transmission for 2,000+ users and enhancing privacy.
- Developed a WebSocket-based chat feature, enabling real-time communication for 1,500+ users and enhancing engagement.
- Implemented GeoFencing technology, restricting app access to specific geographical areas, covering 500+ locations, improving security and user control.

Front End Developer Intern (MapX.world - WalkUp.world)

Apr 2024 – Jun 2024

- Engineered a responsive website using React and Tailwind CSS, which led to a 40% increase in user engagement.
- Seamlessly integrated MetaMask for blockchain transactions, enhancing user experience and security.
- Optimized site performance, reducing page load times by 30% and increasing average session duration by 20%.
- Collaborated with the design team to refine UI elements, ensuring consistency across 15+ pages and enhancing visual appeal.
- Conducted user testing and feedback analysis, implementing improvements that boosted user satisfaction by 25%, as measured by post-implementation surveys.

PROJECTS

Somazon Website (In-Development)

[Link](#)

- Built a scalable web platform using the MERN stack and Redux Toolkit, deployed on Vercel, achieving 99% uptime.
- Integrated Google Auth and JWT, securing user data and improving authentication efficiency by 40%.
- Streamlined payment processes with Stripe Gateway, handling over 500 transactions per day.
- Enhanced user experience with persistent Redux state management and adaptive features like light/dark theme, leading to a 25% increase in user retention.
- Utilized PostgreSQL with CockroachDB for robust and reliable database management, ensuring data integrity across multiple regions.

Saggy Chatting Application (MERN — Socket.io)

[Link](#)

- Generated a secure real-time chatting application with MERN stack and Socket.io, supporting low-latency communication for 1,000+ users.
- Integrated JWT-based authentication, safeguarding user interactions and reducing unauthorized access by 50%.
- Achieved efficient data handling with MongoDB, optimizing data retrieval and storage, enhancing chat responsiveness.
- Implemented user-friendly features like instant notifications and read receipts, increasing user engagement by 30%.
- Enhanced system performance, reducing server response time by 30% through targeted optimizations.

SKILLS

- Front-End Development:** React, Angular, Flutter, React Native
- Back-End Development:** Django, Flask, Express.js, Node.js, Java Spring Boot
- Web Technologies:** Web Sockets, WebRTC
- Security:** Encryption and Security
- Artificial Intelligence:** Generative AI, Large Language Models (LLM), Machine Learning, Computer Vision
- Databases:** SQL, OracleDB, GraphQL, MongoDB
- Project Management:** Scrum, Jira
- Version Control:** GitHub, GitLab, BitBucket
- DevOps and Deployment:** Deployment, Continuous Integration/Continuous Deployment (CI/CD)
- Cloud Platforms:** Amazon Web Services, Google Cloud Platform, Microsoft Azure
